Adumoah Isaac

FRONTEND DEVELOPER

I am passionate about building websites. For me, it's more than just lines of code and design elements; it's a form of art that comes to life on the digital canvas. Crafting user-friendly and visually appealing websites allows me to combine my technical skills with my creative instincts.

UNPAID EXPERIENCE

WEB DEVELOPER ROYAL POINCIANA SCHOOL
January 2021 - December, 2021

Built a school database with PHP for adding new students, grading and uploading results.
Admin, Teacher and Students have their own login information.

MOBILE APPLICATION UNIVERSITY OF GHANA

Built a food delivery application named FOODie app with Java, it allows users create their custom account, order food and also track their delivery status.

MAP OF UG UNIVERSITY OF GHANA

Built an application that allows University of Ghana students find their way to places on campus
Implemented some algorithms like the A* algorithm, Dijkstra algorithm and DFS
